Good Afternoon,

The Wek'eezhii Renewable Resources Board met today and reviewed responses from parties to the Joint GNWT – Tlicho Government Caribou proceeding about the continuation of the hearing process. The Board notes that several of the parties expressed continuing concerns about information or reports in the hands of ENR, GNWT which have not been disclosed and which may be relevant to the proceeding. The Board must ensure that its process is fair. Consequently, the parties to the proceeding should identify any information or reports held by ENR which are relevant and material to the cases being brought before the Board by each of these parties respectively. This should be done in letter format, addressed to Mr. Grant Pryznyk, Interim Chair, and the letter should indicate why the information is relevant and how it will help the party to make its submissions and the Board to make its decision. Any letters requesting additional information must be received by the Board by 3:00 pm June 18, 2010.

The Board will review these requests and identify information which it agrees will be relevant and helpful. The Board will take any steps necessary to procure this information. If any of the information is sensitive or confidential, steps will be taken to ensure that the parties can review the information while protecting any privacy interests in the information. Once the Board has the information requests, it will set out a timeline for the completion of the proceeding.

If you have any questions, please contact our office at (867) 8735740 or jsnortland@wrrb.ca.

Thank you,
JODY
